

Aquarius Charm

We can get to know a person by looking at his home. This project is such a veritable space. The tailor-made space is for the Aquarius male homeowner who works in the technology industry.

Architectural concrete and Japanese rock garden mix and match with custom-made artistic sofas. Visually, it's calm at first, then free and casual style. The personalized space is unique and intriguing.

Just to be distinctive!

The Japanese dry landscape is seamlessly integrated into the limited indoor space of the urban apartment, which can only be found in outdoor courtyards.

The design style is not deliberately defined. The flexibility in functions meets the expectations of Aquarius homeowner who love uniqueness and personality, no matter being alone or having fun with friends.

In the open space where the living room, dining room, and working area are connected. On the basis of Japanese wabi-sabi, the customized assembled blue sofas exist as an island, wandering in the exclusive world, forming a sharp contrast with the rest. In order to not be limited by existing design impression, also corresponds to the functional flexibility of the space, and adds fun and possibilities to the space, the three sofas can be moved individually, and be used independently as a single chair in two-way directions.

The dream mini bar connected to the kitchen simultaneously integrates the multiple functions of double-sided wine storage and electric appliance cabinet with ingenuity.

The retro glass window is used as the pick-up area to isolate the cooking fumes from the stir-fry area of the kitchen, and it also perfectly retains the space, lighting, and penetration.

Trendy, artistic, elegant, and full of yuppie's own way, we define our own unique charm here.

Enjoy at home everywhere!
